

Miroslaw Mus

[▶ Play Intro](#)

Data Analyst | Power BI · Python · SQL · Data Insights

📍 London, UK 📞 +44 7397 001967 ✉ Miroslaw.K.Mus@gmail.com [in LinkedIn](#) [GitHub](#) [Portfolio](#)

First-Class Computer Science graduate from the University of Greenwich with strong analytical skills and professional experience working with operational, stock and system data in a large organisation. Experienced in investigating complex datasets, identifying trends and patterns, improving data quality and translating findings into clear, actionable information. Skilled in Power BI, Python, SQL and Excel, with a strong foundation in statistical analysis, reporting, data visualisation and evidence-based problem solving.

TECHNICAL SKILLS

Data & Analysis: SQL | Python | Pandas | NumPy | Statistical Analysis | Trend Analysis | Data Interpretation | KPI Analysis

Business Intelligence & Reporting: Power BI | Microsoft Excel | Power Query | PivotTables | Dashboard Development | Data Visualisation | Performance Reporting

Data Quality & Improvement: Data Cleaning | Data Validation | Data Quality | Data Integrity | Root-Cause Analysis | Process Improvement | Testing Concepts

Professional: Stakeholder Communication | Technical Communication | Cross-Team Collaboration | Problem Solving | Prioritisation | Continuous Improvement

EDUCATION

University of Greenwich

London, UK

BSc (Hons) Computer Science, First Class Honours (1:1)

Jan 2022 - Jun 2025

Relevant Modules: Database Systems | Machine Learning | Algorithms & Data Structures | Software Engineering | Distributed Systems | Advanced Programming

PROJECTS

Multimodal Data Analysis & Machine Learning Project

[GitHub](#) | Mar 2025

Tech: Python, Pandas, NumPy, PyTorch, Flask, Hugging Face

- Processed, cleaned and validated complex speech and transcript datasets, identifying data-quality issues and preparing reliable data for analysis
- Performed statistical and performance analysis across multiple data sources using accuracy, precision, recall, F1 and ROC-AUC to identify patterns and compare analytical approaches
- Achieved 99.8% validation accuracy through systematic analysis, model evaluation and iterative improvement

AI Portfolio Chatbot Website

[GitHub](#) | Mar 2026

Tech: React, JavaScript, OpenAI API, Serverless Functions, REST APIs, Vercel

- Built and deployed an interactive application integrating a user-facing interface, serverless backend functions and external data services
- Implemented request validation, error handling and structured data exchange to improve reliability and data integrity

Real-Time Multi-Client Chat Application

[GitHub](#) | Feb 2025

Tech: Java, TCP/IP, Multithreading, Client-Server Architecture

- Built a concurrent Java client-server application supporting multiple simultaneous users, with connection management, message routing and error handling

PROFESSIONAL EXPERIENCE

AI Evaluation & Research Contributor

Remote

Prolific

Apr 2026 - Present

- Completed 400+ research tasks focused on AI evaluation, programming and technical studies using structured assessment criteria
- Evaluate AI-generated responses and programming outputs for accuracy, reasoning, instruction following, relevance and overall quality
- Identify errors, inconsistencies and model weaknesses through comparative evaluation, providing structured human feedback to support AI and academic research

Co-op

London, UK

Warehouse Operative

Aug 2017 - Present

- Analyse operational, stock and system data to identify discrepancies, recurring patterns and opportunities for improved performance
- Validate WMS and scanner records, trace stock movements and investigate inconsistencies to maintain accurate and reliable operational data
- Identify root causes of data, system and process issues and communicate findings across teams to support evidence-based decisions and continuous improvement
- Train and support colleagues on systems and procedures, translating complex requirements into clear guidance

ADDITIONAL INFORMATION

Languages: English (fluent) | Polish (native)
