

Miroslaw Mus

[▶ Play Intro](#)

Graduate Data Analyst | SQL · Excel · Power BI · Reporting & Insight

London, UK | +447397001967 | Miroslaw.K.Mus@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Eligible to work in the UK

First-Class Computer Science graduate with experience investigating operational data, resolving data-quality issues and maintaining accurate records within a highly automated logistics environment. Skilled in SQL and Python, with developing capability in Excel, Power Query and Power BI through preparation for Microsoft Exam PL-300. Combining technical analysis with extensive operational experience, seeking a graduate or junior data, BI, reporting or operations analyst role.

TECHNICAL SKILLS

Data & Querying: SQL, Python (pandas, NumPy), Data Cleaning, Data Validation, Descriptive Statistics

BI & Reporting: Excel, Power BI (developing), Power Query (developing), Reporting, Data Visualisation

Tools & Deployment: Jupyter Notebooks, Git, Flask, REST APIs, Docker

Business Skills: Operational Analysis, Root-Cause Investigation, Stakeholder Communication, Structured Problem Solving

EDUCATION

University of Greenwich

London, UK

BSc (Hons) Computer Science, **First Class Honours (1:1)**

Jan 2022 – Jun 2025

Relevant modules: Database Systems, Machine Learning, Algorithms and Data Structures, Distributed Systems, Software Engineering, Advanced Programming

Completed a First-Class Computer Science degree while working full-time, demonstrating strong organisation, discipline and resilience

RELEVANT PROJECTS

Real-Time Multimodal Depression Severity Classifier

[GitHub](#) | Mar 2025

Tools: Python, PyTorch, Wav2Vec2, DeepSeek-8B-LLaMA, Whisper, Flask, Hugging Face

- Processed DAIC-WOZ speech and transcript data, segmenting and resampling audio to 16 kHz, cleaning and tokenising text, and addressing class imbalance across four depression-severity categories
- Fine-tuned Wav2Vec2 for audio classification and evaluated three DeepSeek text models, selecting DeepSeek-8B-LLaMA after it achieved 95.33% accuracy and a 0.9966 ROC-AUC
- Developed a PyTorch multimodal architecture combining audio and text embeddings through bidirectional LSTM layers and multi-head cross-modal attention, achieving 99.82% validation accuracy and a 0.9982 F1-score
- Deployed the models through Flask REST endpoints and Hugging Face Spaces, supporting audio, text and combined inputs with Whisper transcription, JSON predictions and latency monitoring

AI Portfolio Chatbot Website

[GitHub](#) | Mar 2026

Tools: React, JavaScript, OpenAI API, Serverless Functions, REST APIs, Vercel

- Built and deployed a full-stack chatbot application integrating an LLM through the OpenAI API and a responsive React interface
- Implemented serverless functions with input validation, API request handling and error management
- Deployed the application through Vercel, enabling the chatbot to communicate information about projects, technical skills and professional experience

Multi-Client Java Chat Application

[GitHub](#) | Feb 2025

Tools: Java, TCP/IP, Multithreading, Azure Pipelines

- Developed a concurrent client-server application supporting multiple simultaneous users through a multithreaded architecture
- Implemented connection management, message routing and error handling, with automated build workflows through Azure Pipelines

PROFESSIONAL EXPERIENCE

Warehouse Operative (Operations)

London, UK

Co-op

August 2017 – Present

- Worked within a highly automated logistics environment, using warehouse management and scanning systems to maintain accurate inventory and workflow records
- Investigated system discrepancies involving stock movements, scanner records and operational transactions, identifying issues and supporting corrective action
- Maintained accurate records and communicated operational exceptions, recurring problems and workflow updates to supervisors
- Collaborated across teams to resolve system and process issues affecting inventory accuracy and operational performance

Assistant Manager

Costa Coffee

London, UK

October 2016 – August 2017

- Managed stock administration, supplier orders and financial reconciliation, ensuring accurate records across operational systems
- Communicated operational findings and performance updates to management and team members
- Handled customer issues and coordinated daily operations within a fast-paced customer-facing environment

IT Support Engineer

Mircom Computers

Poland

October 2015 – October 2016

- Delivered 1st and 2nd line support across Windows and Linux environments, using systematic investigation to diagnose hardware, software and networking issues
- Administered Active Directory, Microsoft 365, DNS, DHCP and VPN, maintaining accurate system and client documentation
- Investigated incidents using system evidence and communicated causes, resolutions and technical findings clearly to non-technical users
